GLOBAL MARINE SUPPLIES

*Your partner
 in the Med Sea*

GMS and its origins

Global Marine Supplies has been established during 2012 by the merging of Eurosupply SpA and Mercandino Srl, the two most experienced and professional ship chandling companies located in Italy and well reputed in the international maritime world.

Mercandino Srl was founded by Gino Mercandino in the beginning of the 1960's, animated by his spirit of enterprise and prudent business decisions. Through a constant growth and improvement of its organization Eurosupply SpA, essential combination to always ensure high quality services and competitive prices, the company has managed to carve out a niche of growing importance in the ship supply business. Careful choice of dedicated staff members through the years ensures that we are always ready to fulfill customer demands, from the requests for quotation to the final delivery.

Eurosupply Spa started operating under this name in 1994 by merging together three well known shipsuppliers into a new, bigger company. Strongpoints of Eurosupply have always been technical stores, wire and mooring ropes thanks to a huge stock built up in Genoa. The Company owns a testing bed approved by all Classification Societies where it is possible to test all kind of ropes and lifting equipment. Eurosupply is owned by Boccardo's and Poggi's families.

Mercandino and Eurosupply have decided to share their knowledge and experience into a new Company, Global Marine Supplies (GMS) starting operations on Jan 1st 2013 to offer our Customer even better services and prices.

We are sure we will be able to satisfy our Customers requests and to enlarge our range of supplies and services.

The Winning Philosophy of GMS is based on:

- Efficiency and speed in dealing with Customer requests
- Quality of service
- Fast delivery
- Follow up from offer to delivery
- Use of most modern IT tools to manage naval spare parts, orders and logistic support
- Customer satisfaction

The Passion is the driving force of our work and this distinguishes our organization.

Passion is what drives us to face our day to day work as a continuing challenge to solve our Customers problems.

We treat these problems as a top priority in order to find ideas for solutions. Our passion in doing our job is to fulfill the expectations of our Customers.

This is why GMS will become your Problem Solver!!!
